Brandon is responsible for preparing budgets and estimates as well as managing projects from conception and design through closeout. Brandon joined Ergon Inc. in August 2018 as a Project Engineer/Manager. In this role, he was responsible for industrial project scope development, estimating, contracting and management through project completion.

As a part of his role as a Project Manager, Brandon also supported Alliant with estimating and project management. Brandon joined the Alliant team full-time in July 2019. Prior to joining Ergon, he was the lead Estimator and Project Manager for a railroad and site-work construction company in North Mississippi. Originally from Magee, Mississippi, Brandon received a Bachelor of Science in Civil and Environmental Engineering from Mississippi State University in 2017.

PROJECT EXPERIENCE

Canadian National - Bonnet Carre Spillway Bridge Access - 2018

Clear and construct 3.5-mile access road through South Louisiana swamp to allow for constructing a new 3-mile-long Canadian National railroad bridge over the Bonnet Carre Spillway Basin. Brandon was responsible for managing this project from pre-construction logistics and site supervision through completion.

Warren Central Athletics 2019 - 2020

Construction of three new building structures at Warren Central High School, consisting of a concession stand, weight room and locker room as well as other facility upgrades such as new grandstands and a jumbotron.

Other Alliant Experience - 2019

Since coming to Alliant, Brandon has completed over \$2 million in tenant improvement projects in Class A office spaces. He has managed renovation and new construction of multiple Take 5 Oil Change buildings. While at Alliant, Brandon has also been a part of estimating and bidding over \$150 million in projects.
